

Drum Clamp

Drum Clamp - Forklifts are actually utilized to store, move and lift products placed on pallets. For businesses that utilize drums, they often require an attachment to deal with storing, lifting and moving them. There are some different attachments that a company can utilize for all of your drum moving, storing and lifting needs. These attachments are specially utilized to deal with drum containers - thus there is no chance of damage to the product or drum container when they are lifted, stored or moved.

Drum Positioner And Grab

The drum positioner is obtainable in three or four tine models. They are utilized for the loading and unloading of drums off racks, vehicles and drum stands. This attachment is totally automatic, hence allowing the person operating it to operate all from the comfort of the forklift seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This attachment is meant for drum pyramid stacking.

The drum grab can be mounted to the forks, with a designed purpose of handling steel drums that have rolling hoops. Although the original purpose for the design was to deal with steel drums with rolling hoops, the drum grab can help accommodate plastic drums also. Drum capacity maximum is 220 liters for plastic barrels and 210 for steel drums with rolling hoops.

The Rotator

The drum rotator is one more forklift accessory that mounts onto the forks themselves. Their objective is to be able to pick up the drum and rotate it upside down. The drum is clasped into the drum rotator utilizing a clamp that fits around the middle of the drum. The rotation is performed by either a continuous loop chain or a crank handle. The crank handle is intended for operations that occur beneath shoulder level. For operations that should take place over shoulder level, the continual circle chain will be utilized.

The drum tines are carriage mounted or simple fork accessories. They are utilized for unstacking and stacking 210-liter steel drums. Stacking involves nothing elaborate, just simple horizontal positioning of the drums. The carriage-mounted attachments lessen the load center of the drums.

Automatic Tongs

Drum tongs come in both automatic and semi-automatic versions which can be utilized in the tight head and open topped steel drum kinds. The drum tongs could also be attached in many various ways to the lift truck. One method is to attach them under a fork-mounted hook. Another way is to connect them to a fork-mounted jib or a carriage mounted jib. Either the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the operator to ever leave the seat of the lift truck.

Rim Grip Handler

The Rip Grip Drum Handler is the ideal choice for lift truck accessories, whenever there is a necessity to store drums with inadequate space accessible. This accessory can be used on both 120L and 210L drums. The Rim Grip Handler functions by utilizing metal jaws so as to grab the edge of the drum. It lifts the drum and puts it down without needing any space between all of the drums. The typical model utilized in the trade is a zinc-plated handler, even though, this particular attachment is obtainable in stainless steel for the food and drink industry.
